

Welcome to Python

December 30, 2017

```
In [1]: python_glossary={'list':'collection of items in a particular order','tuple':'immutable list',  
    'current state of a program','variable':'use to store values','string':'series of characters'}  
print ('LIST      :'+python_glossary['list'])  
print ('TUPLE     :'+python_glossary['tuple'])  
print ('IF        :'+python_glossary['if'])  
print ('VARIABLE   :'+python_glossary['variable'])  
print ('STRING    :'+python_glossary['string'])
```

```
LIST      :collection of items in a particular order  
TUPLE     :immutable list is called a tuple  
IF        :examine thecurrent state of a program  
VARIABLE  :use to store values  
STRING    :series of characters
```
